SUMMARY

Web Application Developer with ten years of experience (seven years professional) seeking a position where my problem solving skills and programming knowledge can be used to good effect.

- Developed as part of a team and independently
- Lead teams with members both in the US and abroad
- Trained incoming resources

EXPERIENCE

Digital Media Software Engineer, Hobsons
Cincinnati, OH — 2013-Present

Work with account managers and search analysts to build and maintain lead generation websites for the Hobsons EMS division, including integration with multiple internal and external systems. Develop the backend solutions for handling data from these websites, including AWS integration and process monitoring. Create custom reporting interfaces for team members and clients, pulling data from third-party systems and internal products.

Accomplishments

- Migrated 11 websites between servers while updating CMS version
- Designed and developed a new backend contact submission management system, including multiple, external endpoints. Integrated AWS for reliability. This system currently handles all contracts submissions.

EDUCATION

University of Dayton, Dayton, OH
Cum Laude
Bachelor of Science in Computer Science
(minor in Mathematics and Political Science)

SKILLS

Languages - HTML5 (including canvas), Javascript (procedural and object oriented), PHP (including GD), CSS, SQL, XML
Skills - jQuery, KendoUI, AJAX, Facebook App Dev, Game Dev, Joomla, Wordpress, Automation Dev, Website Design, PHP to/from Excel scripting, SOAP, OOP, AWS S3/SQS

Familiarity - C#, C++, Java, Ruby

Interests - Artificial Intelligence, Web 2.0, Mobile, Discrete Math, Logic, Game Design, Digital Marketing

EXPERIENCE cont

Software Engineer, Hobsons (cont)

Cincinnati, OH — 2011-2013

Developed software, focusing on internal processes, automation, monitoring and efficiency throughout the company, along with taking responsibility for some existing internal tools. Also provided frontend development for a new product being written. Primary languages include HTML5, javascript, CSS, PHP, SQL

Accomplishments

- “Information finding” tool used by product support teams
- “Rewards points” management software and display widget
- Form generator and system field creator using Excel documents used by development teams

Senior Front-End Developer, Hobsons (cont)

Cincinnati, OH — 2009-2011

Front-End Developer, Hobsons (cont)

Cincinnati, OH — 2007-2009

Responsible for frontend customization of the standard output from our products, concentrating on content and development. Dealt largely, but not solely, with XSL templates, HTML, Javascript, CSS and C#. Developed tools used by the Front-End Development team to improve processes and efficiency.

Accomplishments

- Kept up with a large number of requests coming in from clients every day, and did so with accuracy.
- Primary source of content and functionality information for client account managers
- Trained a team of remote developers in India
- Lead a team to the successful and on time update of all clients' frontend code to a newer version, and helped to find bugs in the new code base.
- Developed many automation tools used by the team to great effect

Computer Lab Assistant, University of Dayton

Dayton, OH — 2006-2006

Student Housekeeping Assistant Supervisor, University of Dayton

Dayton, OH — 2004-2007
